

Document No.: Revision No. / Date: 01 (CLP) / March 2025

COPPER HYDROXIDE WP 50% CU 2% BLUE

Page 1/8

SECTION 1. IDENTIFICATION OF THE MIXTURE AND OF THE COMPANY/ UNDERTAKING

1.1. Product identifier:

Trade name: COPPER HYDROXIDE WP 50% CU BLUE

(*Wettable powder (WP))

1.2. Relevant identified uses of the mixture: Agriculture - Fungicides

1.3. Other identification way: UFI: 2H00-90DS-R005-T5XA

1.4 Details of the supplier:

SALES Y DERIVADOS DE COBRE S.A. Address: Calle 4, Mz-B1, Lote 18; Urb. Ind. Las Vegas

Puente Piedra, LIMA 22 PERU

Phone Nr.: (51 1)548 0205 Fax Nr.: (51 1)548 3292

E Mail: anycander@saldecoperu.com web: http://www.saldecoperu.com

1.5. Emergency telephone number:

Local Poisons Information Centre

SECTION 2. HAZARDS IDENTIFICATION

2.1. Classification of the mixture:

According to classification rules of Regulation (EC) No 1272/2008: Acute Tox. 4: H302; Eye Dam. 1: H318; Aquatic Acute 1: H400; Aquatic Chronic 1: H410.

Adverse physicochemical effects: Not applicable.

Adverse human health effects: Harmful if swallowed. Causes serious eye damage. Adverse environmental effects: Very toxic to aquatic life with long lasting effects.

2.2. Label elements:

According to Regulation (EC) No 1272/2008:

Hazard

pictogram(s):

Precautionary

Signal word(s): Danger

Hazard H302 - Harmful if swallowed; statement(s): H318 - Causes serious eye damage;

H410 - Very toxic to aquatic life with long lasting effects.

P261 - Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray;

statement(s): P273 - Avoid release to the environment;

P280 - Wear protective gloves/protective clothing/eye protection/face

protection;

P304+P340 - IF INHALED - Remove victim to fresh air and keep at rest in a

position comfortable for breathing;

P305+P351+P338 - IF IN EYES - Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing; P312 - Call a POISON CENTER or doctor/physician if you feel unwell;

P391 - Collect spillage;

P501 - Dispose of contents/container in accordance with local/ regional/

national regulation.

Document No.: Revision No./ Date: 01 (CLP)/ March 2025

Revision No. / Date: 01 (CLP) / March 2025
Page 2/8

COPPER HYDROXIDE WP 50% CU 2% BLUE

Supplemental information:

EUH401 - To avoid risks to human health and the environment, comply with the

instructions for use.

SP 1 - Do not contaminate water with the product or its container (Do not clean application equipment near surface water/Avoid contamination via drains from

farmyards and roads)

2.3. Other hazards: No information available.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances: Not applicable

3.2. Mixtures:

Substance identifier			%	Substance classification	REACH
Name	CAS No	EC No	(w/w)	According to Regulation No 1272/2008	Registration No
Copper Hydroxide (Cu(OH) ₂)	20427-59-2	243-815-9 (EINECS)	50 (**)	Acute Tox. 2: H330; Acute Tox. 4: H302; Eye Dam. 1: H318; Aquatic Acute 1: H400; Aquatic Chronic 1: H410	(*)
Sodium diisopropylnaphthalene sulphonate	1322-93-6	215-343-3 (EINECS)	<1	Acute Tox. 4: H302; Eye Irrit. 2: H319; Acute Tox. 4: H332; STOT SE 3; H335	NA

^(*) Active substance for use in plant protection products only, regarded as being registered (Article 15(1) of Regulation 1907/2006)

Note: Full text of Hazard Statements not written out in full in this section, are referred in section 16.

SECTION 4. FIRST AID MEASURES

4.1. Description of first aid measures:

Inhalation: In case of inhalation move the victim to fresh air. Control breathing and if necessary provide oxygen therapy. Seek medical advice, if symptoms persist or develop.

Skin contact: In case of contact with skin take off contaminated clothing, and wash immediately affected area with water and soap for 15-20 minutes. Seek medical advice, if symptoms persist or develop.

Eye contact: In case of contact with eyes, separate eyelids and rinse immediately with plenty of water for 15-20 minutes; do not forget to remove lens. Seek medical advice.

Ingestion: If swallowed, wash mouth with water provided the victim is conscious. Seek medical advice. Do not give anything by mouth to an unconscious person. Do not induce vomiting unless told so by a physician or poison control centre.

General measures: Seek medical assistance and show the container or label to the physician. Never leave the victim alone.

- **4.2. Most important symptoms and effects:** (associated to active ingredients): **(Copper compounds): Contact** irritation of the eyes, skin and mucous; **Ingestion** gastrointestinal disorder: nausea, vomiting, mouth and oesophagus burn, abdominal ache, diarrhoea eventually with melenas, haemolysis, liver failure with formation of liver granulomas and kidney failure, fever, asthenia. **Inhalation** respiratory disturbs, cough, dyspnoea, increases in mucous secretions; fever.
- **4.3.** Indication of any immediate medical attention and special treatment needed: Provide supportive care and symptomatic treatment. If swallowed induce vomiting or provide a gastric wash; administrate activated charcoal or saline laxative (type: sodium or magnesium sulphate or similar). Antidotes: EDTA, BAL or penicillamine.

SECTION 5. FIREFIGHTING MEASURES

5.1. Extinguishing media:

Suitable extinguishing media: Dry chemicals, carbon dioxide (CO₂), foam and water spray. Unsuitable extinguishing media: Water jet.

^(**) Expressed as copper

Document No.:

Revision No. / Date: 01 (CLP) / March 2025

Page 3/8

COPPER HYDROXIDE WP 50% CU 2% BLUE

5.2. Special hazards arising from the mixture: During a fire, irritating and possibly toxic gases may be generated by thermal decomposition or combustion (copper oxides).

5.3. Advice for fire-fighters:

Protective measures: Evacuate all non essential persons from fire site. Fight fire from a protected location. Avoid inhalation of fumes (keep on windward side). Depending on fire location, it's preferable not to use water to prevent the risk of environmental contamination; if not possible, use spray water consciously. Use water spray to cool containers exposed to fire. Keep adequate measures to prevent environmental contamination. Dike fire control water, for later disposal.

Special protective equipment for fire-fighters: Use self-contained breathing apparatus and complete protective clothes.

SECTION 6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel: Avoid contact or inhalation of product.

For emergency responders: Isolate the spill area and limit the access to essential personnel. Use adequate protective clothes, gloves and protective mask with dust filter. Eliminate any possible ignition source. Ventilate confined space before entry.

- **6.2. Environmental precautions:** Prevent spills dispersion. Keep spills and cleaning runoff, out of sewers and open bodies of water. Block the leakage, if this operation doesn't implicate risks. If product has contaminated bodies of water, sewage system, or soil or vegetation, alert the local authorities.
- **6.3. Methods and material for containment and cleaning up:** Cover entire spill with absorbing material or sand, collect it, avoiding producing dust, and place it in a container appropriate for later disposal. Avoid use of water for cleaning up.
- **6.4. Reference to other sections:** See subsection 8 and 13.

SECTION 7. HANDLING AND STORAGE

7.1. Precautions for safe handling:

Use adequate protective equipment to avoid direct contact or inhalation of the product.

Handle product in well ventilated areas if possible with emergency eyewash and safety shower.

Eliminate any possible ignition source on handling and storing areas. A good personal hygiene is required.

Do not smoke, drink or eat while handling the product.

After handling, remove contaminated clothing and wash hands thoroughly with soap and water.

Keep personal protective equipment and contaminated clothing separate from other laundry; wash it separately.

Don't handle damaged package without adequate protective devices.

Keep the container tightly closed when the product is not in use.

7.2. Conditions for safe storage, including any incompatibilities:

Keep product only in the original container, tightly closed and labelled.

Store on fresh, dry and well ventilated place, protected from sunlight, heat and humidity.

Do not store near flame and heat sources.

Keep away from food, drink and animal feeding stuffs.

Keep children and public away from storage place.

Provide fire-fighting measures and electrostatic discharges protection devices, in storing areas.

7.3. Specific end use: The authorized on label

Document No.: Revision No. / Date: 01 (CLP) / March 2025

COPPER HYDROXIDE WP 50% CU 2% BLUE

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters:

(Copper): ADI: 0,15 mg Cu/kg b.w/day; AOEL: 0,072 mg Cu/kg b.w /day.

TLV-TWA (ACGIH): 1 mg/m³ (copper)

8.2. Exposure controls:

543).

Appropriate engineering controls: Ensure natural or mechanical ventilation, control of ignition sources, fire fighter measures and availability of emergency shower / eyewash in confined work areas. Individual protection measures, such as personal protective equipment: Eye/ face protection: Chemical goggles or safety glasses that assure complete shielding of eyes (for example type Univet

<u>Skin Protection:</u> Apron or other slight protection clothes, nitrile gloves and plastic or rubber boots. Respiratory Protection: Disposable mask with P2 filter.

Thermal hazards: Not applicable

Environmental exposure controls: Avoid spill. Keep the product in proper storing conditions. Keep the containers closed.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties: **Physical State** Solid (Powder) Colour Blue Odour NA Odour threshold NA pH (10% dispertion) 7.3 Melting point/ freezing point NΔ Initial boiling point and boiling range NA Flash point NΑ **Evaporation rate** NΑ **Flammability** Not flammable Upper/lower flammability or explosive limits Not applicable Vapour pressure NA Vapour density NA Relative density 0.55 Solubility NA Partition coefficient n-octanol/water NA Auto-ignition temperature NA **Decomposition temperature** NA Not applicable Viscosity **Explosive properties** Not explosive Oxidising properties Not corrosive 9.2. Other information: Miscibility NA Fat solubility NA Conductivity NA Not applicable Gas group

SECTION 10. STABILITY AND REACTIVITY

- 10.1. Reactivity: No information available.
- **10.2. Chemical stability:** Stable under normal use and storage conditions.
- 10.3. Possibility of hazardous reactions: No information available.
- **10.4. Conditions to avoid:** Avoid storage in moist or hot conditions, and near of heat and ignition sources. Keep away from food, drinks and open bodies of water.

Document No.: Revision No. / Date: 01 (CLP) / March 2025

COPPER HYDROXIDE WP 50% CU 2% BLUE

10.5. Incompatible materials: Alkaline materials. Corrosive to metals.

10.6. Hazardous decomposition products: Thermal decomposition or combustion may generate irritating and probably toxic gases (copper oxides).

SECTION 11. TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects:	
Acute toxicity:	
Acute Oral LD ₅₀ :	833 mg/kg (Rats)
Acute Dermal LD ₅₀ :	>2000 mg/kg (Rats) (*)
Acute Inhalation LC ₅₀ (4h):	>3.61 mg/l air (Rats) (*)
Acute Effects:	
Skin corrosion/ irritation:	Not irritant
Serious eye damage/irritation:	Irritant (Rabbits)
Respiratory sensitisation:	No information available
Skin sensitisation:	Not a skin sensitizer (Guinea pig)
Chronic effects:	
Mutagenicity:	Not observed
Carcinogenicity:	Not observed
Reproductive toxicity:	Not observed
STOT- single exposure:	Not demonstrated

Not demonstrated

No information available

Likely routes of exposure: Contact with skin, eyes, ingestion and inhalation.

Symptoms and effects: See subsection 4.2.

STOT- repeated exposure:

Aspiration hazard:

SECTION 12. ECOLOGICAL INFORMATION

12.1 Toxicity					
Acute toxicity:					
Fish acute LC ₅₀ (96 h):	0.0165 mg/l (Rainbow trout)				
Aquatic invertebrates acute EC ₅₀ (48 h):	0,038 mg /l (Daphnia magna)				
Algae acute E_bC_{50} (72 h):	NA				
Birds acute Oral LD ₅₀ :	223 mg Cu/kg (Bobwhite quail); 556 mg Cu/kg				
	(Japanese quail)				
Bee oral LD ₅₀ (48 h):	49 µg/bee				
Bee contact LD ₅₀ (48 h):	>57 µg/bee				
Aquatic plants CE ₅₀ :	NA				
Chronic toxicity:					
Fish chronic NOEC (48 h)	3.2 mg/l (Zebrafish)				
Aquatic invertebrates chronic NOEC (21 d):	0024 mg Cu/l (Daphnia magna)				
Algae chronic NOEC (72 h):	0.00939 mg/l (Selenastrum capricornotum)				

12.2. Persistence and degradability: (Copper compounds):

- <u>Soil:</u> Very persistent in soil. DT_{50} (typical): 10000 d; DT_{50} (field): 2600 d. Copper compounds are scarcely degradable by soil organisms. It's elimination occurs by physical methods like entrainment and dilution by rain or irrigation water.
- Water: No information available.
- 12.3. Bioaccumulative potential: (Copper compounds): Low bioaccumulation potential. Log Pow< 3.
- **12.4. Mobility in soil: (Copper compounds):** Copper is strongly held in the superficial soil and is practically immobile.
- 12.5. Results of PBT and vPvB assessment: NA.
- 12.6. Other adverse effects: No information available.

^(*) Based on available data, the classification criteria are not met.

Document No.: Revision No./ Date: 01 (CLP)/ March 2025

COPPER HYDROXIDE WP 50% CU 2% BLUE

Page 6/8

SECTION 13 DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods:

Surplus disposal: Dispose in a safe manner in accordance with local/ national regulations. Avoid personnel exposure. Waste material code: 07 04 13* (Council Decision 2001/118/EC).

Containers disposal: Empty containers should be triple rinsed (or equivalent). Do not reuse product containers. Dispose of product containers, waste containers and residues in an authorised waste collection point. Containers should be closed and labelled. Waste material code packaging: 15 01 10* (Council Decision 2001/118/EC).

SECTION 14. TRANSPORT INFORMATION

Transport of dangerous goods by land:

With regard to ADR 2021 and RID 2021:

14.1 UN number: UN2775

14.2 UN proper shipping name: COPPER BASED PESTICIDE, SOLID, TOXIC (Copper Hydroxide)

14.3 Transport hazard 6.1 Labels: 6.1 14.4 Packing group: IIIYes

14.5 Environmental hazards: 14.6 Special precautions for user

> 274, 61, 648 Special regulations: Tunnel restriction code: (C/E) Physico-Chemical properties: see section 9

Limited quantities:

14.7 Transport in bulk Non-applicable

> according to Annex II of Marpol and the IBC Code:

Transport of dangerous goods by sea:

With regard to IMDG 39-18:

14.1 UN number: UN2775

14.2 UN proper shipping name: COPPER BASED PESTICIDE, SOLID, TOXIC (Copper Hydroxide)

6.1 6.1 III14.5 Marine pollutant: Yes

14.6 Special precautions for user

Special regulations: 274, 61 EmS Codes: F-A, S-A Physico-Chemical properties: see section 9

Limited quantities:

Segregation group: Non-applicable 14.7 Transport in bulk Non-applicable

> according to Annex II of Marpol and the IBC Code:

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable: the product is not transported in bulk.

Transport of dangerous goods by air:

With regard to IATA/ICAO 2021:

Document No.: Revision No./ Date:

COPPER HYDROXIDE WP 50% CU 2% 01 (CLP)/ March 2025 **BLUE**

SECTION 15. REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the mixture: Seveso III category: E1

15.2. Chemical safety assessment: Chemical safety assessment was not carried out for the mixture.

SECTION 16. OTHER INFORMATIONS

Content review: The sections / sub sections marked with (>) were changed with relevant information, from the previous version.

Methods for evaluation of the information used for classification: Classification was assigned on the basis of classification data of a similar product.

Full text of Hazard Warnings mentioned and not written out in full in previous sections:

H319 - Causes serious eve irritation:

H330 - Fatal if inhaled;

H332 - Harmful if inhaled;

H335 - May cause respiratory irritation;

H400 - Very toxic to aquatic life.

Glossary:

Document No.:

Revision No./ Date: 01 (CLP)/ March 2025 **COPPER HYDROXIDE WP 50% CU 2% BLUE**

NA: No data available

NOEL: No observed effect level

ADI: Acceptable Daily Intake LC₅₀: Medium Lethal Concentration

AOEL: Acceptable Operator Exposure Level

BCF: Bio-concentration factor

b.w.: Body weight

NOEC: No observed effect concentration CAS: Chemical Abstract Service PBT: Persistent, bioaccumulative and toxic

DT₅₀: Time for 50% loss; half-life TLV: Threshold Limit Value EC₅₀: Medium Effective Concentration TWA: Time Weighted Average

LD₅₀: Medium Lethal Dose. vPvB: Very persistent and very bioaccumulative

This SDS summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user should read this SDS and consider the information in the context of how the product will be handled and used in the workplace including in conjunction with other products.

No liability will be accepted for any injury, loss or damage resulting from failure to take account of information or advice contained in this safety data sheet.

If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact this company.
